please do not report the images to the  
Image Problem Mailbox.**

## **SUMMARY**

### **ABSTRACT**

#### **Personal Voice Emergency Message, Alarm Responder Watch**

The digital device is to be used for recording and retrieving digital personalized recorded messages. Information is recorded in a digital tape or tape-less unit or watch. A speaker connected to device to record and playback for transmittal of messages from the first party to the second party. Playback through means of random access memory for storing digitized messages to house a digital sound generator by receiving and converting personalized-recorded messages into an analog signal and provide said signal to loudspeaker. The devices will house a digital processor for retrieving personalized recorded messages from a tape or tape-less device recording and storing digital messages into random memory.

Most importantly it can be hand carried and worn on or outside of a person's body.

Don't leave home without it.
